DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 30, 33-39, 42 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by FORMAN (5,733,301).

As to claims 30, 42 and 46, FORMAN (Fig. 7; column 8, lines 49-61) discloses balloon 16 having the wall thicknesses of its body portion, its (proximal and distal) cone portions, and its (proximal and distal) waist portions are substantially equal.

As to claims 33-39, FORMAN (Fig. 15; column 10, lines 3-8) discloses balloon 16 having its distal waist wall thickness less than the thickness of its cone wall portions t2 and less than the thickness t1 of body portion as well.

As to claim 43, FORMAN (Fig. 7; column 8, lines 45-59) discloses that the thickness of the cone portions is within (more or less than) from 10% to 25% the thickness of the body portion.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 27-29, 40-41 and 44-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over FORMAN (5,733,301).

As to claims 27-28, and 44-45, FORMAN discloses claimed invention including a process of removing the material of the balloon by laser ablation. FORMAN does not disclose a process of removing a material from a balloon section by grinding or chemical etching. Grinding and chemical etching are well-known processes for accurately removing material from a body. It would have been obvious to one having ordinary skill in the art at the time the invention was made to remove the material from a portion of the FORMAN's balloon by grinding or chemical etching process as these processes are well-known for accurately removing a material from a body.

As to claim 29, FORMAN (Fig. 15; column 10, lines 3-8) discloses the distal waist portion having material removed so as to reduce the distal waist wall thickness and to increase maneuverability.
